

MLAB Open source hardware development system

MLAB is simple electronic modular system. MLAB is usable to build wide range of apparatuses and devices.

It doesn't matter if you are professional developer or hobbyist. Everyone can use many advantages.

- Rapid prototyping
- Rerielable constructions
- All documents are free for noncommercial use

You can build modules yourself from design data situated on www.mlab.cz (some examples are published here too). Or you can order some complete modules or construction kits from our distributor www.ust.cz.
